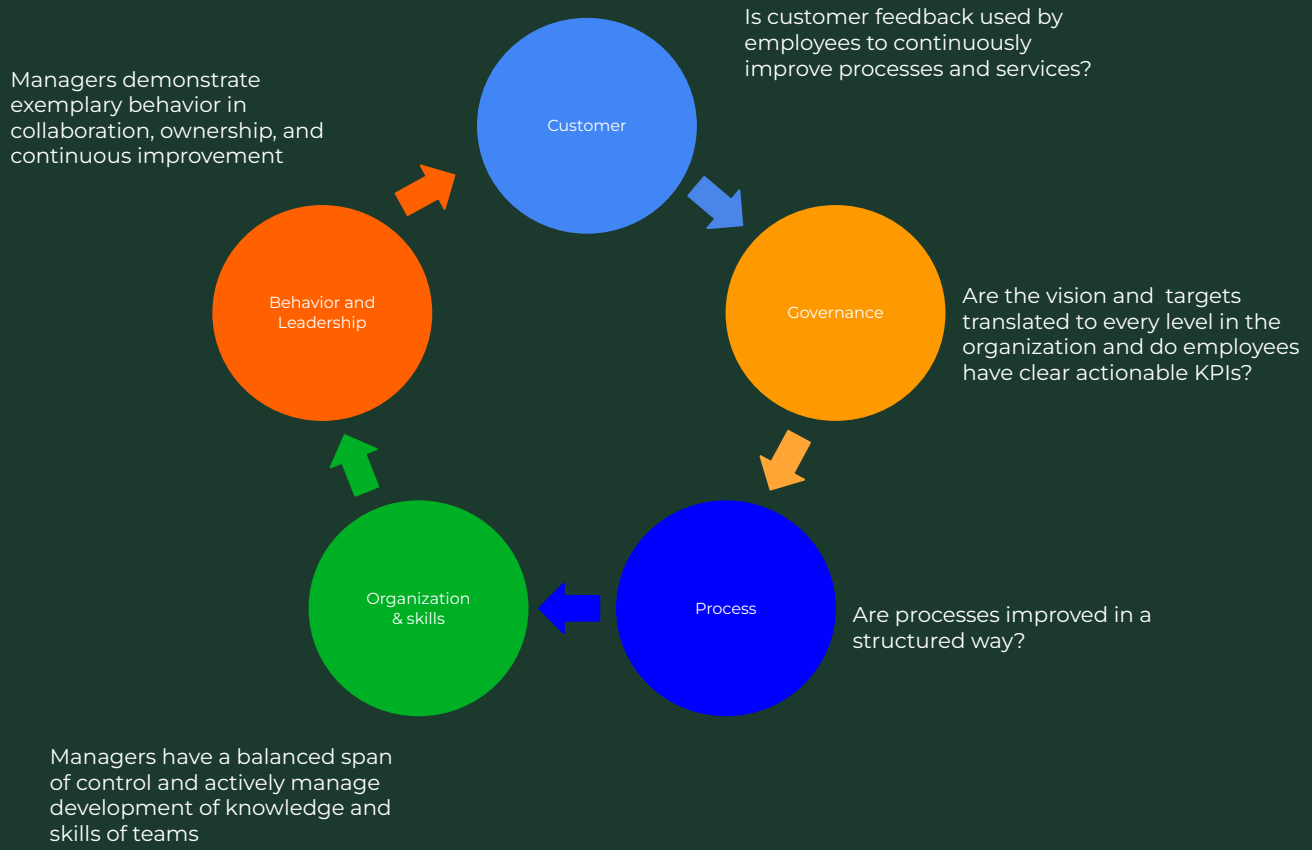
Lean Maturity Scan

Determine the “next step” together

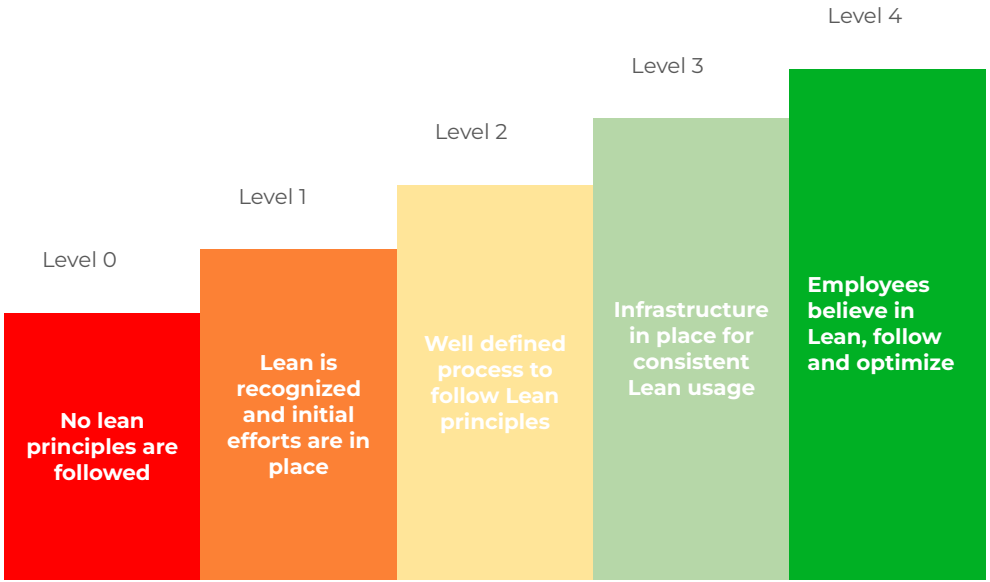


Note: Illustrative data

Lean Maturity Scan

4 scores

- The LMS evaluates and measures the extent to which the 6 lenses, further broken into 16 elements are applied within business lines;
- This results in a score from 0 to 4 for each of the 16 elements;
- The outcomes indicate the lean maturity within the Lean Maturity within this business line;
- This identifies which actions (will) have a positive effect on achieving Lean Maturity goals;



Note: n = 144

Decision required: prioritize focus areas and assign ownership

Three key gaps require actions

Dimension	Observation	Delta	Actions
🔴 **Process** Business line (GRC)	High variation in processes across teams Limited monitoring of deviations	No enforceable, organization-wide process standard	• Introduce a governed process framework with mandatory minimum standards • Implement a control cycle (monthly KPI + deviation review) and embed ownership in line (not project-based)
🔴 **Collaboration** Business line (GSC)	Siloed teams with limited alignment Dependencies not actively managed	No structural end-to-end coordination mechanism	• Establish cross-functional governance cadence (e.g. bi-weekly ops review) and end-to-end ownership per value stream • Align incentives via shared performance targets (not local KPIs)
🟠 **Customer understanding** Business line (FLR)	No structural use of customer feedback Priorities based on assumptions	No embedded feedback loop in decision-making	• Implement closed-loop feedback system (collect → analyze → act → validate) • Integrate insights into prioritization governance (portfolio / backlog) • Define trigger-based actions (e.g. NPS drop → mandatory intervention)

Lean Maturity Scan

Six interconnected lenses

Dimension	CP&L	FLM	FLR	GRC	GSC
Customer	3,15	2,80	3,90	3,25	2,33
Process	2,55	3,40	2,11	1,24	3,20
Governance	3,10	2,95	3,45	2,70	2,85
Behavior	2,70	3,05	2,80	2,60	3,00
Leadership	3,30	3,10	2,95	3,50	3,40
Organization & Skills	2,95	3,25	3,60	2,85	3,15
